THANAPHAT KHUNPHET

Junior Full-Stack Developer

Bangkok, Thailand · 094-591-7535 · thanaphat3254@gmail.com · thanaphat-ku.is-a.dev · github.com/sing198

Full-Stack Developer graduate (B.Sc. in IT & Digital Innovation, GPA 3.18) experienced in building web applications end to end with **React, TypeScript, Vue 3, Go, Node.js, and PostgreSQL/MariaDB**. Completed two software development internships in enterprise ERP (proALPHA) and healthcare systems (GIS Group). Built and deployed transactional e-commerce, real-time WebSocket collaboration, and GIS land-management platforms.

TECHNICAL SKILLS

Frontend	React, TypeScript, JavaScript (ES6+), Vue 3, Tailwind CSS, shadcn/ui, Bulma, HTML5, CSS3, Leaflet
Backend	Go (Gin, GORM), Node.js, Express.js, REST APIs, WebSockets, JWT Auth, RBAC, Progress ABL
Databases & Cache	PostgreSQL, MariaDB, MySQL, SQLite, Redis (Pub/Sub), Relational Schema Design, SQL Transactions
Tools & Workflow	Git, GitHub, Docker, Postman, Vite, Figma (UI/UX & Wireframing), Regression Testing

SOFTWARE ENGINEERING PROJECTS

co-board — Real-Time Collaborative Workspace | React, TypeScript, Go (Gin), WebSocket, Redis, PostgreSQL 2026

Live Demo: kanban-board-eta-five.vercel.app · Source: github.com/sing198/co-board

- Architected a multi-view workspace (Kanban, Table, Calendar, Timeline, Mind Map, and Scrum) with instant cross-tab synchronization over WebSockets and Redis Pub/Sub.
- Implemented request-ID write confirmations and field-level conflict detection (comparing expected prior values) so concurrent edits by teammates do not overwrite unrelated fields.
- Enforced role-based access control (Owner, Editor, Viewer) and validated state consistency with automated frontend and backend test suites.

DGKeys — Digital Game Key Storefront & Order System | React, Go (Gin, GORM), PostgreSQL, JWT 2026

Live Demo: oms-lemon.vercel.app · Source: github.com/sing198/OMS

- Engineered a transactional checkout flow in Go and PostgreSQL that deduplicates cart items, locks product rows in deterministic ID order, and reserves stock atomically to prevent overselling under concurrent orders.
- Verified current account status and role permissions against PostgreSQL on every authenticated request so account suspensions and role changes take effect immediately across active sessions.
- Wrote SQL regression test suites covering invalid quantities, insufficient stock, failed database commits, and permission checks.

Community Land Management System (Walailak University & ALRO) | Vue 3, Node.js, Express, MariaDB, Leaflet 2025 – 2026

Live Demo: community-land.vercel.app · Source: github.com/sing198/land

- Digitized paper-based land records across 14 community alleys into a centralized GIS web application over a 17-table relational MariaDB schema, reducing parcel lookup time to under 5 seconds.
- Built interactive Leaflet map components featuring satellite/road layer switching, color-coded parcel statuses, and a visual lat/long coordinate picker modal for parcel registration.
- Designed 4-tier RBAC permissions (Citizens, Land Reform Officers, Administrative Officers, System Admins), full edit audit trails, SPK 4-01 document uploads, and statistical dashboards with Excel/CSV export.

INTERNSHIP EXPERIENCE

Front-End Developer Intern — GIS GROUP Co., Ltd. (Bangkok) Aug 2025 – Nov 2025

- Built responsive clinical workflow interfaces for a Sports Medicine Clinic system using React, Tailwind CSS, and reusable shadcn/ui components.
- Designed interactive Figma wireframes and UI prototypes, iterating directly with healthcare stakeholders to translate clinical requirements into production screens.

Software Developer Intern — Proalpha Solutions Thailand Co., Ltd. Apr 2025 – Aug 2025

- Developed and customized business logic, database queries, and UI forms across the Sales and Purchase modules of an enterprise ERP platform using Progress OpenEdge ABL.
- Collaborated with senior developers on requirement analysis, test case execution, and peer code reviews for client change requests.

EDUCATION & LANGUAGES

Walailak University — B.Sc. in Information Technology and Digital Innovation (GPA: 3.18) 2022 – 2026

- **Languages:** Thai (Native), English (Intermediate — comfortable reading technical documentation and collaborating in code reviews).
